

21<sup>st</sup> May 2016

Dear Doug

On behalf of Cancer Research UK we are most grateful to have received a further cheque for **£201-13** from the Sleaford Wheelers Cycling Club and a further cheque for **£73-00** from Steve Forman from the sale of photos at your Easter Charity TT 2016 event. These amounts have been added to the cheques you handed to me at the event on 26<sup>th</sup> March 2016 totalling **£1125.00**. I have acknowledged receipt of the further £73.00 directly to Steve Forman.

Again I would like to thank you for organising such a fantastic event that resulted in such an amazing amount of money being raised and donated to Cancer Research UK, and not just for this year but for all the previous years too. Thank you for your support and the loyalty and generosity of the Sleaford Wheeler CC and to everyone who contributed to raise such a magnificent amount to such a very worthy cause. I shall be forwarding these further donations on to Cancer Research UK shortly via Andrea Day our Community Fundraiser Manager for Lincolnshire. I hope that you will be very proud to learn from the knowledge that as always these donations will go towards research into the causes, treatment and prevention of cancer.

My records show that we have been most grateful to have received and forwarded on to Cancer Research UK from these Easter TT events since 2013 (including the money received from Steve Forman and others) a fantastic amount of **£5001.53** and I know that the Easter TT event raised funds previously to that too, but Dad holds the information regarding donations received prior to 2013.

At Cancer Research UK, our world-class doctors and scientists are working together to push through new and effective treatments for cancer faster than ever before, and to prevent more people from developing the disease. Our understanding of the disease has increased greatly and everyday Cancer Research UK is finding new answers to Cancer.

Our scientists are getting closer to finding cures for cancer – whether through targeting treatment or simply detecting cancers earlier. We are on the brink of major breakthroughs. Your donation helps turn these breakthroughs into treatments that could save millions of lives and accelerate our progress against this devastating disease. This work is funded overwhelmingly by donations from the general public, charitable trusts and corporate businesses – without this generous support, our pioneering research simply would not be possible. Thank you for ensuring we received this money so promptly.

One day it is hoped that cures for all cancers will be found and your magnificent donation will help that day come sooner. We believe that the only thing that will beat Cancer is Research.

If you would like further information on fundraising, or the work of Cancer Research UK, please do not hesitate to contact Andrea Day, on **07798 613810** or email [andrea.day@cancer.org.uk](mailto:andrea.day@cancer.org.uk). Alternatively please write to myself at the address above.

Thank you again for thinking of Cancer Research UK.

Yours sincerely

Sue Watson  
Volunteer Ambassador for Cancer Research UK
